Finding-List of Plants at Breeze Hill Gardens

HARRISBURG, PA.

The Residence of

J. HORACE McFARLAND
Twenty-first Street
Bellevue Road and Hillside Road

**THE LIST OF ROSE
VARIETIES BEGINS
ON PAGE 47**

**INCLUDING TRIAL-GARDENS OF THE
J. HORACE McFARLAND COMPANY**

KEY TO PLANT SOURCES

The parentheses next to names enclose sources of plants, as noted, and dates of receipt, in figures. Some of the persons named have since deceased, and some of the firms are out of business. If known, such are indicated thus (*).

(Continued on inside back cover)

FINDING-LIST OF PLANTS AT BREEZE HILL GARDENS

THE list which follows was compiled particularly to give aid in the consideration of the flowers and plants grown at Breeze Hill for study, and for the purpose of supplementing the photographic collection of the J. Horace McFarland Company. As the collection is being constantly improved and changed it is accurate only as of June 12, 1935.

The Breeze Hill property, which includes 2.4 acres, is nearly a quarter segment of a circle, as shown by the diagram, on pages 38–39. There is a variation in elevation of approximately 15 feet on the property, from which the ground falls away gently to the north and much more sharply to the south and east. The average height is 485 feet above sea-level, or about 190 feet above the Susquehanna River at Market Street.

The old mansion house in which Mr. McFarland lives was built in 1875 as the summer home of Jacob F. Haehrlen, a Philadelphia lithographer, who was devoted to grape-growing. Much of the original farm was in vineyard, and ten bearing Concord vines known to have been planted in 1858 still exist in the little vineyard shown on the plan.

Mr. McFarland came into possession of the property in the winter of 1908 (his occupancy beginning June 1, 1909), finding many dead pear trees and decrepit grapevines. Two hedges of American arborvitæ, which separate the garden sections, had been roughly treated. The trees were seven horse-chestnuts and a great American sycamore; hemlocks, pines, Norway spruces, and Norway maples. Of fruit trees, there remained two persimmons, two Buffum pears, and many sour cherry trees. There were a few old lilacs and some old-fashioned roses.

Mr. McFarland's aim, in addition to establishing a pleasant place in which to live, has been to create pictures from and to the home, and of later years to establish a representative collection of plants worth attention. He has been particularly favored by the Arnold Arboretum, and by many friends in the United States, in Europe and in Australia, who have provided rare plants. The Federal Bureau of Plant Industry has been drawn upon through its Special Plant Introduction section. In the last fifteen years much attention has been paid to the rose collection, with special emphasis on the hardy climbers. Within five years, rock and alpine plants have had much consideration, and a large collection is to be found in the sections devoted to them.

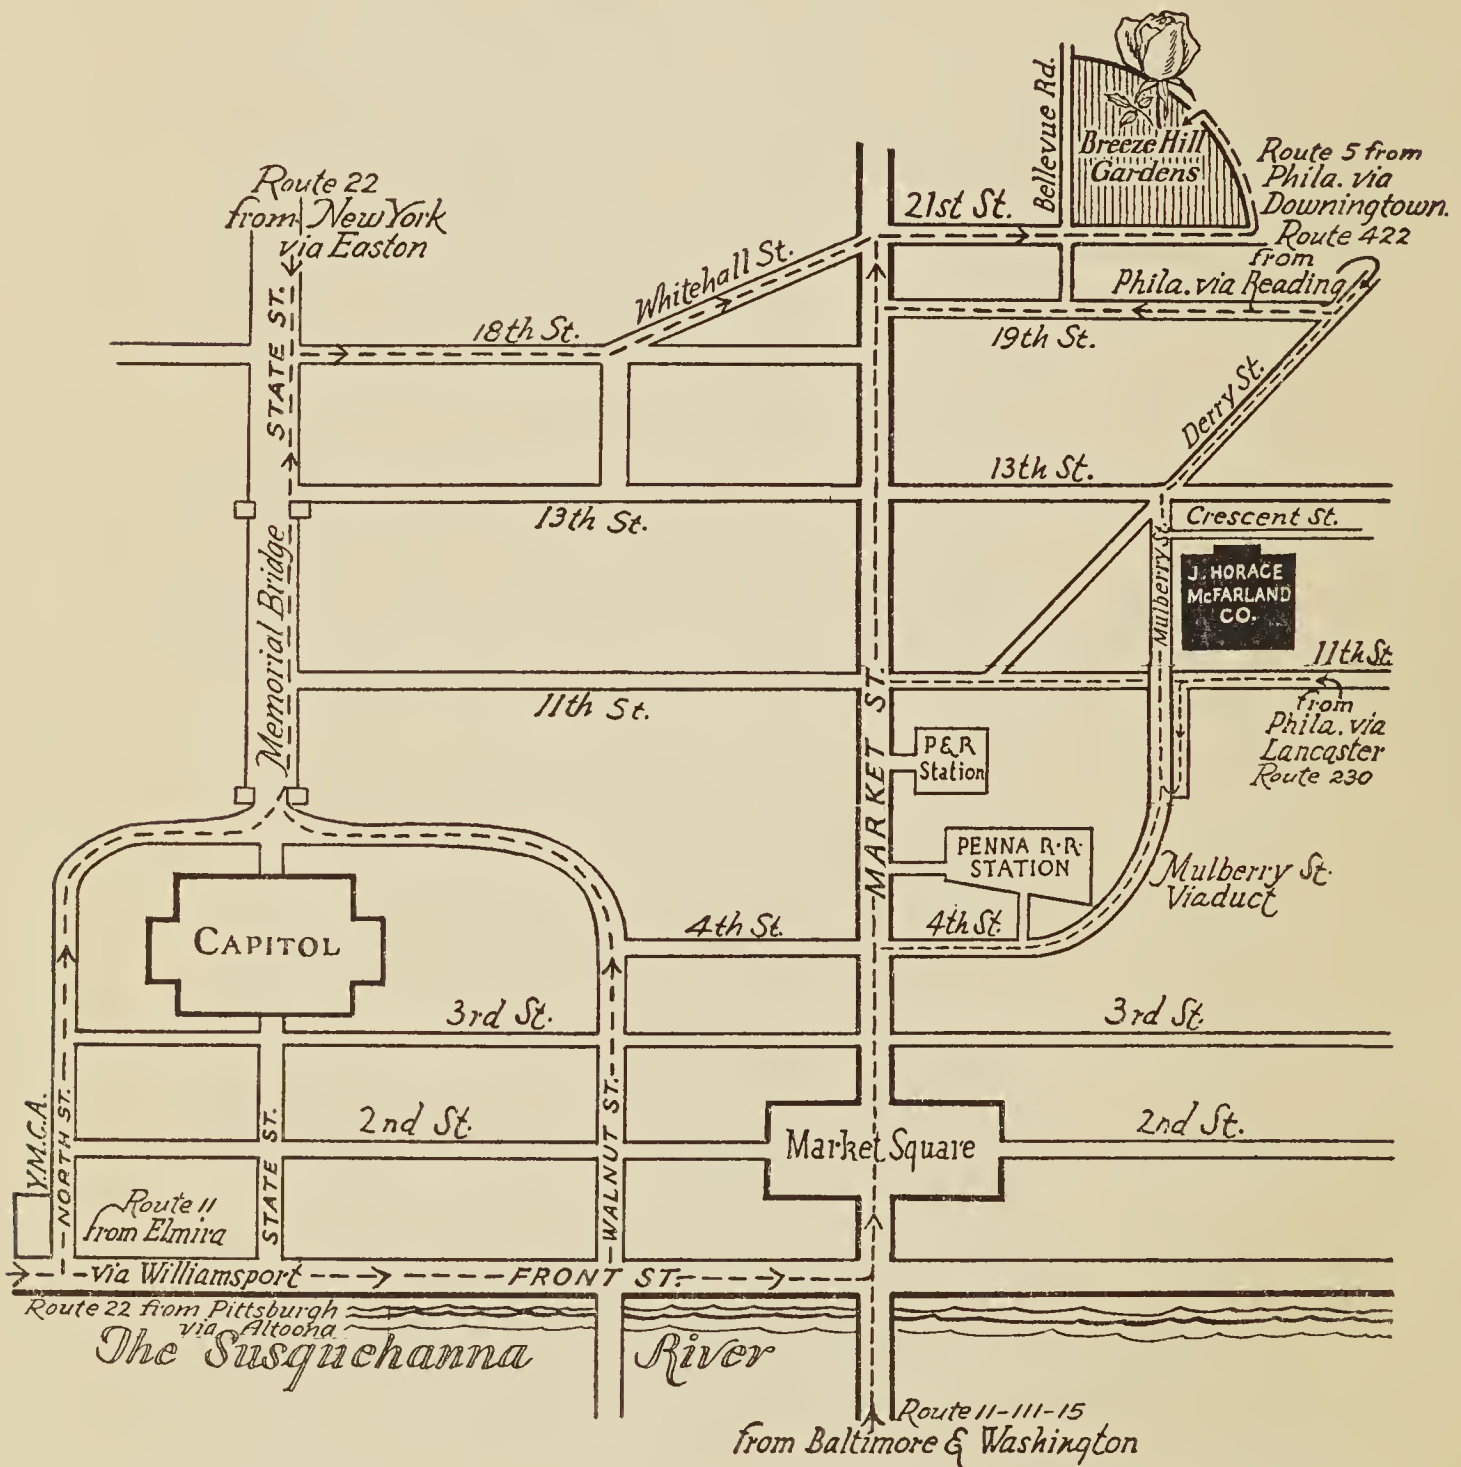

BREEZE HILL Gardens are open to the public, within certain reasonable restrictions as to hours and convenience; a sign at the entrance will indicate when the gardens are closed. Visitors from a distance can always arrange for admission, even though the gardens are closed, by applying to an attendant or by telephone. It is preferred that approach should usually be made through the 21st Street garden gate, or from Hillside Road, avoiding the driveway and the home entrance on Bellevue

Road. The Hillside Road gate is convenient for exit. Cars may be parked on 21st Street, on Hillside Road, and on Bellevue Road, but not in the residence driveway.

Dogs should not be brought into the gardens at any time. If small children accompany parents or other adults, they must be kept in hand. While Mr. McFarland is glad to have the gardens accessible to those who enjoy flowers and plants, it must be understood that the property is not a public park, in which seats and other conveniences are for general use. Breeze Hill is private property, and access to it is a courtesy which may be withdrawn at any time.

Approach to Breeze Hill from the center of the city is by Market Street, east to 21st Street, thence on 21st Street south to Bellevue and Hillside Roads, between which the property lies. Reservoir Park buses (Route 2) run to 21st and Market Streets, and Breeze Hill is two blocks south to the right. The diagram printed below conveniently locates Breeze Hill with reference to the city of Harrisburg and to the Mt. Pleasant Press. It also connects with main highways.

Copies of this Finding-List are freely at the disposal of sincere visitors. Such as so desire may register in the Rose Arbor of the Center Garden.

FINDING-LIST OF PLANTS AT BREEZE HILL GARDENS

EIGHTH EDITION — JUNE 12, 1935

The letters and numbers at the ends of the lines indicate the beds or borders in which the plants may be found. The beds or borders are mostly located by concrete markers in one or two corners of each.

Plants are labeled with embossed copper labels, or with black-and-white labels. On shrubs these hang nearest the walk, or may be found hanging on metal rods in the soil before the plant. There are also some zinc labels at ground-level, or twisted around a main limb. The roses are labeled in groups, and in the Main (or West) Rose-Garden, each bed of one variety has a label giving its source, where it was grown, and the understock used. The climbers have permanent labels in the posts. All the permanent labels are of Mt. Pleasant Press manufacture.

The nomenclature is generally that of "Standardized Plant Names," a copy of which will be found in the Tool-house. It may be useful in seeking common names. The names of roses are according to "Modern Roses" and for recent varieties follow the publications of the American Rose Society.

The characters in parentheses following the names indicate sources and dates. A list of the source abbreviations is printed on the second and third cover pages.

<i>Abelia grandiflora</i>	C-50, C-52-54, C-81-82, E-107-108, F-154
<i>Abies concolor</i> (H42916)	W-29
<i>Abies homolepis</i> (A. <i>brachyphylla</i>) (H42916)	W-31
<i>Abies nordmanniana</i> (DK10626)	East Lawn
<i>Acæna inermis</i> (SBH1932)	W-32
<i>Acer griseum</i> (AA112230)	E-124
<i>Acer japonicum</i> (PC28)	E-122, F-155
<i>Acer pictum parviflorum</i> (CA52428)	E-114
<i>Acer platanoides</i>	C-58, F-153, F-158
<i>Achillea acanthifolia</i> (SBH27)	E-107
<i>Achillea clavennæ</i> (DLR62134)	W-33
<i>Achillea filipendulina</i>	E-107, E-114, F-153
<i>Achillea sibirica</i>	E-107
<i>Achillea tomentosa</i> (BA42531)	W-33

<i>Aconitum autumnale</i>	E-107
<i>Aconitum fisheri</i> (D51726)	E-107
<i>Actæa alba</i>	C-80
<i>Actinea herbacea</i> (CM52035)	W-32
<i>Actinidia arguta</i> (BS42831)	E-114
<i>Adiantum pedatum</i> (GK51329)	C-74, E-119, E-125
<i>Æsculus hippocastanum</i>	Front lawn and along drive
<i>Æsculus parviflora</i> (HI51312)	F-151
<i>Æthionema coridifolium</i> (PY102229)	W-32-33
<i>Agastache rugosa</i> FPI101400 (DA41634)	E-111
<i>Ajuga brockbanki</i> (GG91233)	E-105
<i>Albizzia julibrissin rosea</i> (AA102034)	E-129
<i>Allium thibeticum</i> (WG32230)	W-32
<i>Althæa rosea</i> , many varieties	E-107, etc.
<i>Alyssum argenteum</i> (BS42831)	W-33
<i>Alyssum rostratum</i> (BS42831)	W-33
<i>Alyssum saxatile</i>	C-58, W-32-33
<i>Alyssum saxatile citrinum</i> (GD5632)	C-64
<i>Amelanchier lævis</i> (K41827)	E-114
<i>Ampelopsis aconitifolia</i> FPI2624 (DA2624)	C-82
<i>Ampelopsis heterophylla</i> (BS42831)	W-30
<i>Ampelopsis</i> (<i>Parthenocissus</i>) <i>quinquefolia</i>	C-81
<i>Ampelopsis</i> (<i>Parthenocissus</i>) <i>tricuspidata</i> <i>lowi</i> (BS51331)	

On last post west end of grape-arbor and sun-dial

<i>Amsonia tabernæmontana</i>	E-114, F-153-154, F-159
<i>Anchusa myosotidiflora</i> (WG42127)	F-158, W-2-3-4, and many places
<i>Androsace lanuginosa</i> (BA42531; BORI22033)	W-33
<i>Androsace lanuginosa leichtlini</i> (BORI22033)	W-33
<i>Androsace sarmentosa</i> (BORI22033)	W-33
<i>Anemone apennina</i> (BRYDON28; GRF8432)	C-58, C-80, E-121, W-32-33
<i>Anemone hupehensis</i> , <i>Splendens</i> CM529; (JP52032)	E-107
<i>Anemone hupehensis</i> , <i>September Charm</i> (CM529)	E-107
<i>Anemone japonica</i> (DH41530)	C-58, C-72, E-107
<i>Anemone japonica</i> , <i>Queen Charlotte</i> (DH41530)	C-72
<i>Anemone japonica</i> , <i>Whirlwind</i>	C-58, C-65, C-75
<i>Anemone pulsatilla</i> (BS42831; GD91233)	W-32-33
<i>Anemone pulsatilla alba</i> (GS52335)	W-33
<i>Anemone vernalis</i> (GS52335)	W-33

<i>Anemone</i> 5-29 (CM102031)	E-107
<i>Anemonella thalictroides</i> (HD11429)	F-152

ANNUALS

These are considerably used to fill spaces from which bulbs have been lifted, and for cutting. See also Testing-Gardens.

<i>Anthemis tinctoria</i> (DH1934)	E-107
Apple, Crab, Transcendent	W-31
Apples, Flowering Crab. See <i>Malus</i> .	

APPLES: Bismarck (espalier), E-111; Delicious, (E-116); Golden Delicious (SB41220), East Lawn; Red Astrachan, (E-107); Smokehouse (HN41114), (E-106); Yellow Transparent, (E-103).

<i>Aquilegia alpina</i> (BV11830)	W-33
<i>Aquilegia canadensis</i>	E-105, F-152, W-33, etc.
<i>Aquilegia</i> Hybrids, many varieties	C-59, C-70-71, C-78, C-81, etc.

The *Aquilegia* Hybrids now include the "Breeze Hill strain," resulting from careful selection for some 15 years, into which are being bred hybrids of *Aquilegia longissima*.

<i>Aquilegia longissima</i> (SBH1931)	C-81, etc.
<i>Arabis alpina</i>	W-33
<i>Arabis alpina rosea</i> (CP51035)	W-32
<i>Arabis procurrens</i> (MN111027; BS42831)	C-64, W-32-33
<i>Aralia ricinifolia</i> (EC41220)	Work-Yard
<i>Arenaria grandiflora</i> (SBH1932)	W-33
<i>Arenaria montana</i> (TN1926)	C-58, W-32
<i>Arenaria verna cæspitosa</i>	W-32
<i>Arisæma dracontium</i> (HD11429)	C-58
<i>Arisæma triphyllum</i>	C-58, C-74, C-80
<i>Aronia arbutifolia</i>	W-30
<i>Artemisia frigida</i> (BA42531)	W-33
<i>Artemisia siversiana</i> FPI103178 (DA4235)	E-107
<i>Artemisia vulgaris lactiflora</i> (PN42813; F4925)	E-108, F-151
<i>Artemisia vulgaris lactiflora</i> , Silver King (DH51531)	E-107
<i>Arum maculatum</i> (GRI12331)	W-33
<i>Aruncus sylvestris</i> (RO11625)	C-79, E-108
<i>Asclepias tuberosa</i> (WG32230)	E-102, W-32
<i>Asperula odorata</i> (WG32230)	W-31-32
<i>Asphodeline lutea</i> (<i>Asphodelus luteus</i>)	E-107
<i>Aspidium</i> (<i>Polystichum</i>) <i>angulare</i> (DI930; DI933)	C-80

---------------------------------	-------

BERBERIS

There are many Barberries about Breeze Hill. The *B. thunbergi* hedges on Bellevue Road and on 21st St. were planted about 1911. The plants came from the Biltmore Nursery. *B. verruculosa*, a fine dwarf evergreen variety, is used to border beds C-76, E-106, E-107, and E-108 at the Azalea circle. Some choice Barberries are in C-76.

Berberis darwini depressa (OG4731).....	W-33
Berberis gagnepaini (AA101426).....	C-76

<i>Bignonia radicans</i>	F-156
BLUEBERRIES, Whitesbog varieties (WB33021)	E-126
<i>Bocconia cordata</i>	C-55, E-104

BOG PLANTS

Bog conditions are maintained at several places in connection with rock-planting. A concrete base or "apron" under the surface soil permits suitable extension of soil-moisture at E-125, near the Maple "spring" at west end of C-58, and at the base of the moraines which drain W-32 and W-33 into a bog-pool.

CENTER GARDEN

This garden is formal in outline, four of the beds being bordered with Dwarf Box. The older Rose hedges, and most of the Peonies are in it. The two long borders in the shelter of the Arborvitæ hedge (C-65, C-72) are used for rare plants needing protection from high winds. On the north side of these borders many wild flowers and native Azaleas are located (C-80, C-74). The Iris Garden and Water Lily Pool are in the western end of the northern section, and also Maple Brook with its bog.

<i>Cephalaria alpina</i> (GRI932).....	E-102
<i>Cerastium tomentosum</i>	C-64
<i>Ceratostigma plumbaginoides</i> (BVI1830).....	C-76, E-106
<i>Cercis canadensis</i> (M32213).....	E-122, F-151

<i>Diospyros virginiana</i> (Staminate and Pistillate trees)	East Lawn
<i>Doronicum cordifolium</i> (GS42134)	E-108
<i>Doronicum excelsum</i> (GD71731; DLR5233)	E-107
<i>Doronicum pardalianches</i> , Bunch of Gold	E-108
<i>Draba armata</i> (<i>D. longirostra</i>) (GD91233)	W-33
<i>Draba fladnizensis</i> (BS42831)	W-33
<i>Draba repens</i> (BS42831)	W-33

EAST GARDEN. East from E-109 along Hillside Road to corner Bellevue Road, thence west to front entrance near E-100, continuing on east side of residence to lawn under Sycamore to E-106 and E-107.

The East Garden includes the Lilac collection, most of the Deutzias and Philadelphuses, the Laurels, and the larger group of *Rhododendron maximum*. In it also are several bearing Pear trees and the Persimmons. The noble Sycamore, known to exceed 200 years in age, is in the western edge of this garden. The flourishing Linden, planted about 1897, is just west of the Axis Walk.

<i>Eccremocarpus scaber</i> (raised from seed from A. H. BENNETT, Victoria, B. C., 1934).....	W-32
<i>Echinocereus</i> (<i>Pediocactus</i>) <i>simpsoni</i> (AD41131).....	W-33
<i>Echinocereus viridiflorus</i> (AD41131).....	W-33

<i>Erythronium revolutum</i> (PY101029)	E-121
<i>Erythronium revolutum</i> , Cream (PY101029)	E-121
<i>Erythronium revolutum johnsoni</i> (PY102625; BORI22033) . .	E-121, F-160
<i>Erythronium revolutum</i> , Pink Beauty (PY101029)	E-121
<i>Erythronium revolutum</i> , Purdy's White (PY101029)	E-121
<i>Erythronium tuolumense</i> (BORI22033)	E-121
<i>Erythronium watsoni</i> (PY101029)	E-121

An endeavor has been made to locate permanently the many fine California "Dog's-tooth Violets" along the Axis Walk in E-121.

ESPALIER of trained Apple and Pear Trees Near E-124

These were planted in 1911, with trained trees from Germany. They are annually detached from the trellis, pruned, sprayed, and again tied up.

<i>EUONYMUS alatus compactus</i> (BS51331)	C-56
<i>Euonymus japonicus variegatus</i> FPI62717 (DA4131)	E-111
<i>Euonymus patens</i> (K41827)	C-76
<i>Euonymus radicans</i> (HI51012)	Garden Wall
<i>Euonymus radicans kewensis</i>	F-150
<i>Euonymus radicans minimus</i> (BS51331)	C-71, Work-Yard
<i>Euonymus radicans vegetus</i>	C-81
<i>Euonymus</i> sp. FPI90345 (DA4632)	E-111
<i>Euonymus yedoensis</i> (WY41229)	C-56
<i>Eupatorium</i> (<i>Conoclinium</i>) <i>cœlestinum</i> (DH1929)	C-72, etc.
<i>Eupatorium perfoliatum</i> (EM9230)	W-33
<i>Eupatorium urticæfolium</i> (<i>E. ageratoides</i>)	C-80, etc.
<i>Euphorbia myrsinites</i> (BS42831)	W-33
<i>Euphorbia polychroma</i> (<i>E. epithymoides</i>) (BS42531; GD91233) .	E-102, W-33

EVERGREENS

Several old Norway Spruces, White Pines, and Hemlocks, together with the now retrograding hedges of American Arborvitæ, were on the place in 1909. (See *Picea*, *Pinus*, *Tsuga*, *Thuja*.) Many have been added and are growing into characteristic beauty. An interesting group is near the front entrance at E-100. The specimens of Japanese Yew in W-29 and W-3 are good, and other coniferous evergreens are in various locations. (See *Abies*, *Taxus*, *Pseudotsuga*.)

Broad-leaved Evergreens are becoming a feature. There are several of the American Holly and other Hollies, some evergreen Cotoneasters, Barberries, and a Magnolia. The *Pachysandra* plantings are considerable and effective. (See *Cotoneaster*, *Berberis*, *Galax*, *Ilex*, *Magnolia*, *Ligustrum*, *Leucothoe*, *Lonicera*, *Osmanthus*, *Pachysandra*, *Pachistima*, *Pieris*, *Rhododendron*.)

FERNS: See *Adiantum*, *Aspidium*, *Dennstedtia*, *Osmunda*, *Polystichum*.

The most of the Ferns are near E-121, E-125, E-118, E-119. Good specimens of Maidenhair are in E-119, and in E-101 are fine plants of *Osmunda regalis*.

- Festuca ovina glauca* (JA1927) W-32-33
- Filipendula* (*Ulmaria*) *camtschatica rosea* (CA52428) E-103, F-107
- Filipendula hexapetala* (*Spiræa filipendula*) (PN42813) . E-102, E-108, W-33
- FORSYTHIA densiflora** (CA52428) E-103
- Forsythia intermedia* (AA111013) F-153, W-2
- Forsythia intermedia primulina* (AA517) E-114
- Forsythia intermedia spectabilis* (AA517) E-104

The last three *Forsythia* items have done much, since their receipt in 1913 and 1917 from the Arnold Arboretum, to bring attention to their superiority. *F. ovata* blooms more than a week earlier than other sorts.

- Forsythia ovata* (AA101426) E-104
- Forsythia suspensa atrocaulis* (D111224) E-107
- Forsythia viridissima* E-104
- Fothergilla monticola* (MORRISON28) E-123
- Franklinia* (*Gordonia*) *alatomaha* (WB42725; DEE41629; DY103029) . C-75
- Fritillaria imperialis* and var. *Aurora* W-29

FRONT GARDEN. From corner Bellevue Road and 21st Street to front entrance; all west of residence to and including drive entrance on 21st Street.

The Front Garden includes five of the six Horse-chestnuts planted in 1876 or earlier, all of which were split and badly decayed in their trunks when the present occupancy began in 1909. They have been carefully repaired by the Davey organization and are good examples of skillful "tree surgery." The Lovers' Lane entrance from 21st Street gives access to the fine specimen of Dwarf Horse-chestnut (*Æsculus parviflora*) and to the woods plants and Aconites on the left in F-159, where also are naturalized some California *Erythroniums*.

GLADIOLUS.....Many places

No attempt is made to list the scores of varieties grown each summer, each sort being labeled where it is planted.

Gleditsia sinensis.....Outside automobile entrance, south

Gooseberry, Industry.....E-108

GRAPES

There are ten Grape-vines known to have been planted in 1859 or earlier—all Concord save one. Grape-growing seems to have begun in this location when it was named "Bellevue" in 1819 by Ludwig Lambert Gall, according to the "Annals of Harrisburg." Christopher Haehnlen grew grapes in 1836, and his son, Jacob F. Haehnlen, grew grapes here extensively from 1859.

GROUND-COVER PLANTS

Much attention is given at Breeze Hill to the growing of plants that will agreeably substitute for the lawn grasses in places unfavorable to the latter. The Pachysandra cover near F-157, under a large Horse-chestnut, and under other trees, and in shaded locations may be mentioned. At the driveway entrance to the residence Vinca minor is prospering. Several forms of Violet, including the old "Johnny-jump-up" are availed of. In many places Anchusa myosotidiflora is being established. There are trials of Hydrangea petiolaris and Xanthorhiza apiifolia, and Convallaria majalis and Hedera helix are also used to satisfaction. A pleasing blue-flowered Veronica is being introduced, and also an old Fragaria carpets some spots. Where taller plants are admissible, Chrysanthemum koreanum and Amsonia tabernæmontana do very well, both in shade and in sun.

The Lily collection has been planted in many locations for experiment, and is quite uncertain. Bulbs are constantly shifted in pursuit of successful results. The terminology here used is that of Standardized Plant Names so far as that work goes; for names not there cited, Bailey's Cyclopaedia is followed, or Wilson's "Lilies of Eastern Asia."

Voie Lactee (FIII228)	W-3I

The Mock Orange collection is mostly in the East Garden. It embraces species and sorts covering a bloom period of about six weeks. Attention is called to the sorts providing notable and peculiar fragrances. *P. subcanus*, an early species, gives an odor of hyacinths; *P. sericanthus rehderianus* has the fragrance of *Valeriana officinalis*, and *P. purpurascens* that of sweet peas. The Lemoine hybrid, Belle Etoile, gives gardenia fragrance.

PHLOX <i>cæspitosa</i> (PJM92232)	W-33

PLATANUS occidentalis **East Lawn**

This great Sycamore is the dominating tree of the neighborhood. It is known to have been an important object in 1819. Much effort has been expended to prevent damage to the living tree by a destructive anthracnose which causes defoliation. For several years it has been sprayed with bordeaux mixture at a pressure of 600 pounds and carefully fed underground through a series of holes punched in the lawn.

<i>Quercus dumosa</i> (AN103032).....	W-33

RARE PLANT NURSERY

The many unusual plants coming to Breeze Hill are planted first in the nursery on both sides of the Espalier (E-105 and E-111) for protection, as this location is particularly favorable.

<i>Rhamnus japonica</i> (AA111016).....	Work-Yard
RHODODENDRON <i>atlanticum</i> × <i>japonicum</i> (GA32532).....	E-106
<i>Rhododendron carolinianum</i> (K5613; K42616; RO11127).....	C-74
<i>Rhododendron catawbiense</i> (RO4127).....	C-80
<i>Rhododendron dahuricum</i>	C-81
<i>Rhododendron hybridum</i> , Cunningham's White (DPS4716).....	C-74
<i>Rhododendron hybridum</i> seedlings (SW41030).....	C-74
<i>Rhododendron maximum</i> (BH51712; RO11127).....	C-80, E-110, F-158
<i>Rhododendron micranthum</i> (AA111013).....	C-65
<i>Rhododendron mucronulatum</i> (<i>R. dauricum mucronulatum</i>) FPI71126 (DA13930).....	C-74
<i>Rhododendron poukhanense</i> (true) (GA102930; GA32031)...	C-76, E-124
<i>Rhododendron racemosum</i> 56363 J. F. Rock × <i>R. carolinianum</i> (GA32031).....	E-106
<i>Rhododendron racemosum</i> seedling (GA5732).....	W-33
<i>Rhododendron</i> sp., Red-flowering (<i>R. C. ROBINETTE</i> , Princeton, W. Va., 112633).....	E-110

The *Rhododendrons* need to be considered in connection with the *Azaleas*. Botanically, all are now classed as *Rhododendrons*.

<i>Ribes aureum</i> (EB32913).....	W-3
<i>Robinia pseudacacia</i>	E-113, W-30, etc.

ROCK-GARDENS

Rock-Plants at Breeze Hill are at W-32, W-33, E-121, E-125. The first rock planting was done in the spring of 1927, in "Lovers' Lane," F-158. In most locations, moving water is a feature, and provides a certain measure of bog conditions. Maple Brook in the west end of C-58 is arranged to keep the contiguous soil moist for plants which require boggy conditions. A similar provision is made at E-125. The plants in the various rock-gardens are being constantly changed and adapted. In the newer sections, W-32 and W-33, one little moraine is planned for acid-loving plants. Underground irrigation is provided for these sections.

ROCK-PLANTS

For convenience in reference, the various species planted in the different rock-gardens (mostly in W-32-33) are here separately listed. Many of these items are found also in other parts of the Gardens.

BELLEVUE ROAD

TWENTY-FIRST ST.

FINDING DIAGRAM OF BREEZE HILL GARDENS IN HARRISBURG, PA.

The northern boundary of the Breeze Hill property runs 340 feet on Bellevue Road; the western line is 400 feet on 21st Street; the curved boundary on Hillside Road of 585 feet completes this three-sided plot of 2.4 acres.

For convenience, certain arbitrary garden divisions have been established within the property. The West Garden, public entrance to which is on 21st Street, is in the southwest corner and includes most of the roses. The Center Garden runs eastward from the Work-yard to the Orchard, and north to the rear of the residence. The Hillside Road entrance, also used as an exit, is reached in the Center Garden. The Front Garden is the northwest corner from the driveway to the walk to the residence from Bellevue Road. The East Garden runs east from this residence approach to the corner of Bellevue Road and Hillside Road, and southward to include the Orchard, the Espalier, and the Nursery beds.

Both the upright (in W-29) and the diffuse (in W-3) forms of the Japanese Yew are represented by notable specimens. When planted in November, 1914, the two trees in W-29 were about 4½ feet high.

- Taxus media hatfieldi* (AA102034).....F-128
Taxus media hicksi (H142029).....C-80, C-82

TESTING-GARDENS.....South of Vineyard

In these Testing-Gardens are grown each year various Annuals, usually of the less conventional sorts, in order to test their general desirability. The All-America Seed Trials are an annual feature. Each planting is labeled with name and source. Also there are beds used for the newer roses, including some seedlings.

- Teucrium chamædrys* (WG32230).....W-33

THUJA occidentalis.....Old inner hedges

These Arborvitæ, forming originally a lane of approach (now Lovers' Lane), and dividing the house grounds from the greenhouse that stood where the Center Garden now is, were probably planted about 1876, and were beheaded about twenty-five years later, giving them a shock from which they have never recovered.

WALL PLANTING

The walls in the Center Garden were built in April, 1928, when grading was made necessary for the Lily-pool. The stones used were carefully selected and placed by G. A. Stevens, planting following closely. The steps were "home-made" upon design by Mr. Stevens.

WATER GARDEN

The Lily-pool in the Center Garden was built and planted in April, 1928. Other water features are Maple Brook at west end of C-58, and the pools in Rock-Garden at W-32, W-33, and E-125.

THE ROSES AT BREEZE HILL

ROSA

The endeavor at Breeze Hill is to grow for test, photograph, and to make color records of all obtainable roses that seem to be of value and importance. This endeavor is aided by many of the more important growers and hybridizers, who recognize the scope, impartiality, and value of these tests, consequently sending us their productions, often before they are deemed to be worthy of names or patents.

Because of the close relation of the executives of the American Rose Society to Breeze Hill, it may be assumed that the Breeze Hill rose-test is of the same nature as that conducted by the National Rose Society of England, at Haywards Heath, although no awards are here made or recorded.

The rose genus at Breeze Hill is represented by the following species, mostly in two locations—one at the eastern edge of the Rose-Garden (W-4), and the other at the eastern edge of the Orchard (E-112).

<i>Rosa acicularis.</i> (CP41426)	W-4

<i>Rosa odorata</i> 22449 (<i>R. indica major</i> ; Fun Jwan Lo).....	C-75

This is the famous "Odorata" understock form sent to the Department of Agriculture by its explorer, the late Frank N. Meyer, prior to 1919. He found it in a garden at Pautang Fu, Chihli Province. Prof. M. L. Hancock, of the University of Nanking, reports it as bearing the local name of Fun Jwan Lo. It is believed to be identical with "Texas Wax," and to have been used in France and in England as an understock many years ago under the name *Indica Major*.

AUSTRALIAN ROSES South of Vineyard; in West Garden

The first shipment of these varieties left New South Wales on March 16, 1927, were received in Washington on April 15, and after inspection and release were planted April 19. These roses were supplied for American trial by H. H. Hazlewood, Epping, N. S. W. All lived until the severe winter of 1929-30, when several "passed out." The varieties are: Australia Felix, Borderer, Bushfire, Daydream, E. N. Ward, Fancy Free, Flying Colours, Gwen Nash, Harbinger, Kitty Kininmonth, Loretto, Lorraine Lee, Mrs. E. Willis, Mrs. Frank Guthrie, Milkmaid, Mrs. R. M. Finch, Miss Marion Manifold, Nora Cuninghame, Queen of Hearts, Scorcher, Squatter's Dream, Sunny South, Salmon Spray, Vanity.

Another shipment, received June 11, 1928, included: Agnes Barclay, Catherine Blackburn, Cherub, Countess of Stradbroke, Cranbrook, Jessie Clark, Lottie Foster, Mrs. Philip Russell, Sunday Best, Climbing Ophelia × Padre, Cupid × Konigin Carola, Red-Letter Day × Isobel, Rev. F. Page-Roberts × Padre (now called Warrawee), Radiance × Comtesse du Cayla, Climbing Ophelia × Walter Clark, Ophelia × Rev. F. Page-Roberts, Mme. Butterfly × Hoosier Beauty, Star of Queensland × Mrs. C. V. Haworth, Radiance × Mr. P. L. Baudet.

A third shipment, received August 5, 1929, included Golden Dawn, Mrs. Albert Nash, Mrs. Philip Russell, Joyce Fairey, Edith Clark, Lady Fairbairn, Sentinel, Refresher, Mary Guthrie, Traverser, and Countess of Stradbroke; another on August 16, 1930, Mrs. Hugh Dettman and Courier; and another on August 23, 1930, Dorothy Mollison, Judith Black, Lady Somers, Madge Taylor, Mrs. Norman Weston, Stately.

A fourth shipment, received June 29, 1932, included Amy Johnson, Beauty of New South Wales, Billy Boiler, Doris Downes, Judith Black, Lady Fairbairn, Lady Heaton Rhodes, Madge Taylor, Margaret Turnbull, Mary Guthrie, Set Fair, Southern Cross, Stately, War Paint.

Most of the Australian climbers are on the arches in C-1 and C-19. Some duplicates are on the arches in W-3 and W-4.

The Bloomfield varieties are the production of the late Capt. George C. Thomas, Jr., of Beverly Hills, Calif. As noted, they are mostly in two locations. Capt. Thomas was also the originator of the fine pillar rose, Dr. Huey, and also of Mrs. George C. Thomas, Bishop Darlington, and others. His new climbing varieties are at the south ends of C-2, 3, 4, 6, 7, 8, 9, in the trial-bed section of the Center Garden.

BOBBINK & ATKINS

This important rose-growing nursery is represented by many varieties in the trial-beds of the Center Garden, and in the display beds by one showing of Souvenir de Jean Soupert. This firm has also provided many of the azaleas, planted mostly in E-106.

May 15, 1926, information received from Dr. L. C. Corbett, Bureau of Plant Industry, that this rose had been named "Breeze Hill."

BREEZE HILL SEEDLINGS

Various hybridizations by Mr. Stevens and incidental seedlings raised at Breeze Hill may be found in E-128. A fine hybrid of (*R. wichuraiana* × *R. rugosa alba*) × Eldorado, raised by Mr. Stevens in 1921, has been named Vanguard, and is now in commerce. It was awarded the Dr. Walter Van Fleet Gold Medal by the American Rose Society on October 6, 1932. It is in bed C-7.

HARDY CLIMBING ROSES

Because of the almost inextricable confusion between the Wichuraiana and the Multiflora climbers, they have been divided into two classes—Ramblers (R.) and Large-flowering Climbers (LC.). The Climbing Hybrid Tea and the Climbing Hybrid Perpetual roses are separately listed. The Australian Climbers are mentioned under Australian roses.

HYBRID PERPETUAL ROSES

These are in the West Garden, back of the circle of Polyantha varieties. The sorts included are here duplicated for convenience.

American Beauty	Gloire de Chedane-	Mme. Albert Barbier
Anna de Diesbach	Guinoisseau	Mrs. John Laing
Arrillaga	Gloire de l'Exposition de	Mrs. R. G. Sharman-
Baroness Rothschild	Bruxelles	Crawford
Black Prince	Gloire Lyonnaise	S. M. Gustave V
Candeur Lyonnaise	Harmony	Soleil d'Or
Captain Hayward	Henry Nevard	Sonnenlicht
Clio	Hugh Dickson	Souv. de Mme. H.
Druschki Rubra	Jan Bohm	Thuret
Everest	J. B. Clark	St. Ingebert
Frau Karl Druschki	Jean Liabaud	Studienrat Schlenz
General Stefanik	Jubilee	Suzanne Marie Rodo-
Georg Arends	Louise Crette	canachi
George Dickson	Magna Charta	

HYBRID RUGOSA ROSES

Mostly grouped east of the Rose Arbor, north of Orchard.

Agnes	F. J. Grootendorst	Ruskin
Amelie Gravereaux	Mme. Lucien de Ville-	Sarah Van Fleet
Dr. Eckener	mont	Schneezweg
Dr. E. M. Mills	Pink Grootendorst	Vanguard
Fern Kemp		

HYBRID TEA ROSES

In the formal beds of the West Garden and in the trial-bed section of the Center Garden. In the West Garden the central feature is the planting in the 1935 Spring in ground very carefully prepared in the 1934 Fall, of eight display beds, mostly of 20 and 30 of a kind. These beds are labeled not only as to variety but as to origin, understock, and time of planting. Many Hybrid Teas received for testing, not infrequently yet unnamed, are in the trial-beds in the Center Garden, south of the Vineyard at its western end (C-2, 3, 4, 6, 7, 8, 9) For convenience the sorts are here duplicated.

Abol	Coral	Francie Simms
Adorable	Crimson Glory	Frau Dr. Kruger
Agnes Foster Wright	Cuba	Frau Dr. Schricker
Albast	Cupid × Konigin Carola	Frau E. Weigand

JACKSON & PERKINS ROSES

This great wholesale rose-growing firm has extensive research work proceeding at its nurseries in Newark, N. Y., in which Dr. J. H. Nicolas carries on its testing, hybridization, and general investigation. A considerable number of roses are to be found, especially along the Climber rows in the Center Garden, as received from this firm, including many varieties of great potential importance.

SETIGERA HYBRIDS

All these Setigera hybrids were made by M. H. Horvath, of Mentor, Ohio, in an attempt to provide climbing roses of value that could endure at least 20 degrees below zero. They carried through the severe winter of 1933-34 with little or no damage. Later hybrids have recently been added, and there are also in the trial-beds certain Hybrid Tea varieties into which Mr. Horvath has bred the Setigera strain.
